

## ABSTRACT

The present invention provides a urea derivative or a salt thereof, which is useful as a therapeutic agent for thrombosis. The derivative is represented by Formula (I):

5 [Chemical formula I]

wherein Cy is an aromatic hydrocarbon group which may be substituted or an aromatic heterocyclic group which may be substituted; R<sup>1</sup> is a hydrogen atom or a hydrocarbon group which may be substituted; V is -C(O)-, -S(O)-, or -S(O)<sub>2</sub>-; W is -N(R<sup>2</sup>)-, -O-, or a bond (wherein R<sup>2</sup> is a hydrogen atom or a hydrocarbon group which may be substituted); X is alkylene which may be substituted; Y is -C(O)-, -S(O)-, or -S(O)<sub>2</sub>-; Z is a bond, a chain hydrocarbon group which may be substituted, or -N=; ring A is a non-aromatic nitrogen-containing heterocyclic ring which may be substituted; ring B is a nitrogen-containing heterocyclic ring which may be substituted; and

[Chemical formula 2]

are each independently a single bond or a double bond;

provided that R<sup>1</sup> may be bonded to R<sup>2</sup> to form a non-aromatic nitrogen-containing heterocyclic ring and that R<sup>2</sup> may be bonded to a substituent of X to form a non-aromatic

nitrogen-containing heterocyclic ring which may be substituted.
